

PREMIER PALACE HOTEL
Nomen est omen

Ref. № 1000 .
From October 22, 2013

Letter of recommendation

Hotel "Premier Palace" expresses its gratitude to the Blue Energy international Company for providing the innovative equipment for air conditioning systems that have no analogues in the world for energy efficiency: Adiabatic pre-cooling panels Blue Energy.

At high ambient temperatures the cooling equipment operates at the limit and consumes maximum power of electricity, which greatly affected the overall financial expenditures of the hotel.

The aim of purchasing the adiabatic pre-cooling panels Blue Energy: to reduce power consumption and increase efficiency in cooling equipment.

After start-up of the "Blue Energy" equipment by means of monitoring by the hotel staff of PJSC "Hotel "Premier Palace" and PJSC "Kyivenergo" of the data on electricity consumption, it was figured out that for the season from June to September 2013 the Premier Palace Hotel saved 320000 kWh - 24% and significantly improved cooling efficiency by 29%.

We would especially like to mention the high professionalism of the Blue Energy international specialists in understanding customer's needs, quality and timely delivery of the order.

We will be glad to recommend Blue Energy equipment, adiabatic pre – cooling panels. Blue energy int is reliable and responsible company in the Ukrainian market on solutions for cooling efficiency and energy saving objectives in the refrigeration and air conditioning systems.
